IT Candidate Needed for Brodie International Internship

May 14, 2019

Brodie International, in Statesboro, needs to fill an IT internship ASAP. Successful candidates may be offered a full-time salaried position upon completion of the internship. The intern will be the on-site contact for IT support, and carry out any IT-related projects that may arise, with the assistance of an IT consulting company.

Brodie's entire IT infrastructure has recently been rebuilt, so at this point they need a high-level helpdesk contact. The successful candidate will be able to give recommendations to start upgrade projects as they see fit. That's over and above the day-to-day upkeep, so it's a great learning opportunity.

Very general overview:

- Windows server administration
 - AD, DHCP, DNS, etc.
- Network/PC troubleshooting as needed
- New workstation set-up, following a checklist
- Light web development to periodically update company site

All of the core skills that GSU's IT program teaches apply here. Experience with Adobe products is a plus though (Illustrator, InDesign, Photoshop), as the intern will also back up the literature/documentation team with developing graphics and such. A minor/second discipline in graphic design would be beneficial.

Please contact Michelle Lau (michelle.lau@brodieintl.com) for more information.
